Karin Tomazic

Frontend Developer — React · Next.js · TypeScript

Maribor, Slovenia · Open to remote, full-time or contract

tomazickarin@gmail.com · karintomazic.com · linkedin.com/in/karin-tomazic · github.com/karintomazic

Summary

Frontend developer with 7+ years of experience building websites and web apps for enterprise companies, international organisations and AI startups. I build accessible, well-tested interfaces with React, Next.js and TypeScript, with components documented in Storybook and tested with Vitest and Playwright. I work AI-first with Claude and Codex and spend my time on architecture and code review. Looking for a remote frontend role in a React / Next.js / TypeScript team.

Skills

Frontend: React, Next.js (App Router), TypeScript, JavaScript, HTML, CSS, SCSS, Tailwind CSS, Astro, TanStack Query

Testing: Storybook, Vitest, React Testing Library, Playwright, MSW

Accessibility & design: WCAG, accessible components, UI/UX design, Figma

CMS & backend: Drupal (Twig theming), WordPress / WooCommerce, Moodle, PocketBase, Auth.js, Drizzle ORM, SQLite

Tools & workflow: Git, Docker, Vite, AI-assisted development (Claude Code, Codex)

Currently learning: Node.js, NestJS

Experience

Frontend & Drupal Developer — Agiledrop (remote)

Apr 2020 – Nov 2026 · Staff-augmentation agency

- Placed on 5+ long-running client projects, from Drupal websites to React and Next.js apps. Clients included Olex.ai (an AI English-learning platform), iqual (a Swiss digital agency), T-Systems and the University of Ljubljana.
- Built React and Next.js frontends in TypeScript, with reusable components documented in Storybook.
- Built and themed Drupal websites with Twig, SCSS and JavaScript, and customised Moodle learning platforms for the University of Ljubljana.
- Joined existing teams and codebases and was productive within days; worked closely with designers, developers and clients.
- Adopted an AI-assisted workflow with Claude and Codex, using Vitest, React Testing Library and Playwright tests to keep the generated code reliable.

Frontend Developer & UI/UX Designer (Internship) — AM Creative Agency

May 2019 – Apr 2020

- Built WooCommerce online shops on WordPress: custom themes, checkout pages and client change requests.
- Designed user interfaces and page layouts for client websites.

Projects

- **tattoobyjs** — Client website for a tattoo artist in Maribor, with a portfolio, aftercare products and booking info. Content is managed through a self-hosted PocketBase backend running in Docker. *Next.js, React, PocketBase, Tailwind CSS, Docker*
- **Movie database app** — Search across movies, TV shows and people, with user accounts. Migrated feature by feature from Vite + React Router to the Next.js App Router. Includes 59 Storybook stories with mocked APIs, run as browser tests. *Next.js, TypeScript, Auth.js, Drizzle, TanStack Query, Storybook, Vitest, Playwright*
- **iobi** — Product catalogue in Slovenian, English and German, with dark mode, for a family business making handcrafted concrete garden products. Launching December 2026. *Next.js, React, PocketBase, Tailwind CSS, Docker*

Education & languages

Udemy certificates: JavaScript, TypeScript, React, UI design

Environmental Engineering — Higher Vocational College L.I.V.E., 2016 – 2018

Languages: Slovenian (native), English (professional working proficiency)
